Over 7 years in GRC/Compliance within the regulated financial sector (EY FSO, Top 5 insurers, Top 3 BR conglomerates, ANS health operators) and 15 years of total professional trajectory. Specialist in risk management, internal controls and regulatory compliance, bridging the insurance and banking prudential regimes — operationalisation of SUSEP Circular 638/2021 (risk management, internal controls and compliance), analogous to CMN 4.893/2021 and BACEN 4.557. Combines regulatory fluency (SOX, COSO, ISO 37301, BACEN/SUSEP/ANS, LGPD) with a data and AI layer (Python, Power BI, automation and AI governance), delivering up to 99% reduction in risk reporting cycles and controls governance in environments with R\$ 14bn+ in assets. Active CRC (1SP336304).

SELECTED PROJECTS

GRC Technical Specification — IBM OpenPages

Delivered (EY)

Led the technical specification of the enterprise GRC implementation on IBM OpenPages, aligned with SOX, COSO and ISO 37301 — foundation for mapping 200+ regulations (SUSEP/ANS/BACEN/LGPD) in the Compliance transformation programme of a Top 5 BR insurer.

Stack: IBM OpenPages · SOX · COSO · ISO 37301

Corporate Risk Heatmap (IBM OpenPages + Python)

Delivered (EY)

200+ regulations (SUSEP/ANS/BACEN/LGPD) integrated via Python ETL; quarterly risk reporting reduced from 16h → 8min (–99%). Interactive visualisation integrating probability × impact × regulatory criticality in Power BI. Adopted by the client as the reporting standard for working groups and replicated across 3 additional EY engagements.

Stack: Python · IBM OpenPages · Power BI · SQL Server

BACEN Regulatory Advisory — Banking (Traditional & Digital)

Delivered (EY)

BACEN regulatory compliance advisory for banks and fintechs: adherence analysis to Res. 4.557 (Risk Management), 4.658 (Cybersecurity) and 4.595 (Open Banking); internal controls mapping for SOX and Operational Risk frameworks; support in regulatory due diligence and Third-Party Risk Assessment.

Stack: BACEN · SOX · Operational Risk · TPRM

SUSEP Benchmarking Platform

Personal project · in development

Analytical intelligence platform for the Brazilian insurance market over SUSEP open data: executive dashboards with KPIs, competitive rankings, loss-ratio analysis and insurer benchmarking. Ingestion of 5M+ records/month via automated Python ETL and proprietary 10-pillar score. MVP in development — not yet released to production.

Stack: Python · FastAPI · PostgreSQL · Docker

Antifraud System

Personal project · MVP

Financial fraud detection system with AI and human review: engine with 30+ rules (anomalous transaction patterns, velocity, geolocation, device fingerprinting, behavioural score), detection KPI dashboard and analyst review workflow — designed from a compliance standpoint (LGPD, algorithmic transparency, auditability).

Stack: React · TypeScript · Node.js · PostgreSQL · scikit-learn
