Risk, Internal Controls & Regulatory Compliance Specialist | Financial Services — Insurance · Banking · Health | Senior Consultant at EY (FSO) | Active CRC 1SP336304

São Paulo, SP | +55 (17) 98191-7954 | icaro.vl@outlook.com | linkedin.com/in/oleaoicaro | github.com/oleaoicaro

15 years of professional experience, more than 7 of them in risk management, compliance and internal audit. Experience across Top 5 insurers, a Top 3 banking conglomerate and health operators. At EY, I led the corporate GRC implementation (IBM OpenPages) at a major insurer, mapping 200+ regulations (SUSEP, BACEN, ANS, ANPD) and shortening monitoring and risk reporting cycles. I combine regulatory fluency (including SOX, COSO and ISO 37301) with data and AI automation (Python, Power BI). Accountant with an active CRC.

PROFESSIONAL EXPERIENCE

Ernst & Young (EY)

2022 – Present

Senior Consultant | Risk & Compliance

Aug/2025 – Present

Property & Casualty Insurance Company | Multi-Year Compliance Transformation Programme

- Coordinated the multi-year Compliance transformation programme of a Top 5 Brazil insurer, with a team of 5+ professionals and direct reporting to C-Level
- Led the corporate GRC implementation on IBM OpenPages, driving the mapping of 200+ regulations (BACEN, ANS, LGPD) grounded in SOX, COSO and ISO 37301, and shortening the regulatory assessment cycle by 60% (from ~45 to 18 days)
- Built the operation's compliance intelligence: 22 KRIs across 4 dashboards for different areas and entities, cutting risk reporting from 16 hours to 8 minutes and eliminating 99% of the manual effort via Python
- Operationalised SUSEP Circular 638/2021 with monitoring of 50+ relevant vendors (TPRM) and identification of non-compliance events

Risk Consultant

Oct/2023 – Jul/2025

Dental Plan, Health Plan and Insurance Operator | Internal Audit and Internal Controls

- Conducted internal audit and internal controls activities (risk-based), covering loss ratio, claim denials, AML and LGPD
- Tested 60+ internal controls (design and effectiveness) and classified findings by criticality — with root-cause analysis and action plans negotiated with the business
- Used human-reviewed generative AI (GenEY) to support the full lifecycle of these activities — from regulation analysis and test-plan definition to report generation

Business Consultant / Consulting FSO Trainee

Feb/2022 – Sep/2023

Traditional Insurance Company | Revitalisation Programme (8 mos) · Banking & Fintechs

- Served as strategic PO of the revitalisation programme at an insurer with around R\$ 200 million in premiums, orchestrating 25 initiatives with a biweekly Steering Committee
- Supported the design of 8 customer journeys and the lifecycle of 15 products
- Briefly worked on the compliance front, conducting regulatory due diligence at fintechs transitioning from payment institution to financial institution, ensuring adherence to the applicable regulatory requirements

OTHER SELECTED PROJECTS

Corporate Risk Heatmap (IBM OpenPages + Python)

Executive panel that answers "where is our risk?" at a glance: 200+ regulations crossed by probability, impact and regulatory criticality, fed automatically.

Stack: Python · IBM OpenPages · Power BI · SQL Server

SUSEP Benchmarking Platform

Competitive intelligence for the insurance market built on SUSEP open data: rankings, loss ratios, solvency and sanctioning processes for every insurer in the country, distilled into a proprietary 10-pillar score. 13+ datasets integrated with automatic refresh.

Stack: Python · FastAPI · SQLAlchemy · Pandas · Plotly · Docker · LLM/AI Chat

Antifraud System

Detects and manages fraud in life insurance and pension claims: each claim is scored by rules across 6 dimensions, enters an analysis queue with a graph view of the connections between parties, and feeds executive dashboards of geographic exposure and team performance. Built to withstand audit: algorithmic transparency, audit trails and role-based access.

Stack: React · TypeScript · Vite · Tailwind · Radix UI · Recharts

Regulatory Intelligence Hub

A "regulatory Bloomberg": automatically captures SUSEP publications, summarises each regulation and lets you score its impact, and organises the end-to-end response — owner, action plan, control test and compliance dashboard. Architecture ready to extend to BACEN, CVM, ANS and others.

Stack: Python · FastAPI · Next.js/TypeScript · PostgreSQL · Celery/Redis · Playwright · OpenAI API · Docker

Regulatory Norms Analysis (Compliance)

Corporate tool for managing SUSEP regulations and action plans: runs in the browser with no server, syncs via SharePoint, keeps a full audit trail and consolidates regulation criticality into Probability × Impact embedded in Excel reports.

Stack: JavaScript · SheetJS · Python (pandas · matplotlib · openpyxl)

Regulatory Risk Feedback Loop

Closes the regulatory risk loop: recalculates each regulation's risk from real evidence — infraction notices, internal audits, SUSEP official letters — through configurable rules, showing rule by rule why the risk went up or down.

Stack: React 19 · TypeScript · Vite · Tailwind/shadcn · Recharts · Vitest
